HORIZON-CL3-2022-DRS-01-01: Enhanced citizen preparedness in the event of a disaster or crisis-related emergency

Proposal idea/content

- *Description of the proposed project:*
- *Education will be the magic key of this project in order to open the required doors.*
- *As a result of the feasibility search, it was obvious that there is a great deficiency in respect of Universities providing both a bachelor and a master's degree program in the field of "disaster or crisis-related emergency" globally.*
- *Moreover this field isn't also included enough throughout the Curriculum Programme of Education Systems of Primary, Secondary and High Schools in most of the countries worldwide.*
- *The main aim of the project will be trying to create a Global Model Curriculum Programme cooperating with all of the relevant partner organizations and citizens throughout the project.*

Project participants

- *Desired consortium: Proposed coordinator: TCS*

- *Partners Desired:*

Universities providing both a bachelor and a master's degree program in the field of "disaster or crisis-related emergency" like York University (<https://futurestudents.yorku.ca/program/disaster-emergency-management>)

- *In addition, enhanced cooperation and involvement of different sectors and actors are essential, including policy-makers, scientists, industry/Small and Medium Enterprises (SMEs), public administration (both at national and regional/local level), scientists, credit/financial institutions, practitioners, Non-Governmental Organisations (NGOs), and Civil-Society Organisations (CSOs), notwithstanding the citizen dimension.*
