**15 Years Experience
in EU Projects**

SMS4EMS

Proposal idea/content

- *Consolidation the demand for innovative security technologies*
- *Combination of potential EU-based supply of technical alternatives that could address common needs of EU public buyers*
- *Adressing improved visibility of the potential demand in the EU market for common security Technologies*
- *Providing common validation strategies, rapid innovation, experimentation and PCP.*
- *Pave the way to innovative tendering guidance, commonly agreed validation strategies and evidence-based prospects of further joint procurement of common security solutions.*
